Comment Sheet				
Do you AGREE or DISAGREE with the following recommendation and implementation statements?		Agree	Disagree	Don't Know
1	Rebuild the City's Indoor Public Swimming Pools at a total cost between \$50 to \$52 million: the average cost to each Vancouver household would be \$24.00 per year over the next ten (10) years.			
2	Expand the capacity of the City's Indoor Public Swimming Pools from 2 to 2.4 million swims per year to serve existing and future population growth over the next ten (10) years.			
3	Locate the City's Indoor Public Swimming Pools within three (3) kilometers of most Vancouver residents.			
4	Provide Indoor Swimming Pools for recreation and leisure swimming, swim lessons, fitness and therapeutic programmes, aquatic sport club training and local meets, but NOT for top level national and international competitions.			
5	Immediately rebuild the City's Indoor Public Swimming Pools at Percy Norman, Killarney and Renfrew.			
6	Within ten (10) years, replace the remaining City's Indoor Public Swimming Pools at Vancouver Aquatic Centre, Kerrisdale, Lord Byng and Templeton.			
7	Do not replace the City's Outdoor Public Swimming Pools at Mount Pleasant and Sunset when they wear out.			
Where do you live?: Please provide the first three (3) letters of your postal code - Ex: V 6 G
