

COMMISSIONER ENQUIRIES – SUMMARY REPORT

Date Received	Topic	Submitted By	Summary of request	Board Update
April 22, 2024	W.C. Shelly Park Renewal Update	Commissioner Christensen	Can staff provide an update on the W.C. Shelly Park renewal and the status of the fencing around the demolition area, and when the fencing will be removed?	The removal of the former buildings on site is complete and staff are working finalizing contracts for temporary greening of the newly expanded area of WC Shelly Park to allow the public to use the expanded park space. The temporary park space will consist of an expanded lawn area along with a new wildflower pollinator meadow which will be opened to the public following establishment of the seeded lawn and meadow, likely in fall of 2024. Staff are also advancing the longer-term design of the new park space and anticipate engaging the public on the design in late 2024. The park concept will be brought to the Board for endorsement in early 2025 and subject to Board approval and input construction could start in early 2026. Information signs will be provided on the construction fencing.
